

Graduate software engineer with computer science foundations and hands-on Python, SQL, JavaScript, FastAPI, REST API, data analytics, dashboarding, classification modelling and NLP transformer project work. Targeting graduate and internship roles across software engineering, data analytics, machine learning and AI engineering in Ireland.

FINAL YEAR PROJECT WordFlow — AI Chrome Extension for Dyslexic Writing Support Supervised by Dr. Irene Murtagh, TU Dublin School of Informatics & Cybersecurity - Built an AI-powered Chrome extension using a fine-tuned T5 transformer model (NLP/ML) for real-time writing correction targeted at dyslexic users. - Trained a custom 6,571-pair dataset combining curated, JFLEG benchmark, and synthetically generated dyslexic error patterns. - Built a Python FastAPI backend (stateless REST API) and Manifest V3 Chrome extension (JavaScript). - Achieved 78% full correction accuracy; phonetic error accuracy ~92%; sub-second latency (300–800ms) on CPU. - Privacy-first architecture: no raw user text stored, GDPR-compliant, HTTPS encrypted. - Evaluated with real users recruited through Dyslexia Ireland; compared to Grammarly.	
EXPERIENCE Data & Game Systems Analyst — MC9 FiveM Server March 2024 – Present - Managed and analysed player data for 20,000+ member community, 200+ daily active users. - Built Lua and JavaScript automation scripts, reducing manual admin work by 30%. - Applied SQL queries to track player retention, detect anomalies, improve engagement KPIs. - Led live testing, bug reporting, analytics-driven system improvements. Academic Data Analyst — TU Dublin Projects 2023–2025 - Cleaned and visualised datasets (Titanic, Credit Risk) using Pandas, NumPy, Matplotlib. - Built classification models with Scikit-learn achieving 85%+ accuracy. - Created dashboards for academic presentations and decision support. Student Coordinator — TU Dublin Computing Society Sept 2023 – Present - Organised peer-learning sessions on data analytics and programming fundamentals.	
EDUCATION BSc (Hons) Software Engineering 2022–2026 Technological University Dublin Graduated 2026, Level 8. Focus: Data Analytics, Machine Learning, Software Systems. Leaving Certificate 2022 Hartstown Community School	
TECHNICAL SKILLS Languages Python, SQL, JavaScript, Lua, Java, C++, PHP Software FastAPI, REST APIs, Chrome Extension development, Git/GitHub, automation scripts, software systems Data Pandas, NumPy, Matplotlib, SQL queries, Power BI, Excel, dashboards, KPI analysis ML/AI Scikit-learn, Hugging Face Transformers, NLP, transformer models, TensorFlow (beginner) Tools Jupyter, VS Code, IntelliJ, MySQL, MongoDB, Firebase Cloud AWS, Google Cloud (basic)	
PROFESSIONAL DEVELOPMENT - Graduate Ireland Fair - AWS Career Event - Workday Tech Event - TU Dublin Open Day - TU Dublin Graduate Day
